Amir Khezri

Graphic Designer

Hello, I am Amir Khezri, a graphic and motion designer who works in Iran, but sometimes I also accept foreign projects.

I have been working in design and graphics for almost 5–6 years and of course, I am still learning…

I have a bachelor's degree in software engineering from Tabriz Technical College, indeed, my degree and my job are not very related, but in my opinion, using software logic and art emotions at the same time can make the output of the work more practical and of course more beautiful. Something I deeply believe in!
